

# Mental Health Interpreting

Individualized Consultation and Training - 90 minutes

## Experience Welcome - None Necessary

There is a lot to learn and begin practicing even years before accepting work in this specialty area. Whether you actively avoid mental health assignments and plan to continue doing so, or you are someone with many years of experience, there is much to *explore*. My intention is for these conversations to be *safe and non-judgmental* as well as to *inspire* new approaches to the work.

## A Unique way to explore this topic

Within the learning objectives is a lot of room for *your unique interests and orientation* to this topic. I am always learning about this *multifaceted* area - and much of that comes directly out of the conversations with interpreters that I have been having for the past six years.

## The Details
